For Immediate Release

SEAL ANALYTICAL LAUNCHES NEW DISCRETE ANALYZER AT PITTCON 2010

SEAL Analytical, leaders in flow and discrete nutrient analyzers, announce the launch of a **NEW** discrete Analyzer – **the SEAL AQ1**. The AQ1 Discrete is the latest in the SEAL Analytical nutrient analyzer family. With over 50 years experience in the environmental field, SEAL has designed the AQ1 to meet the needs of environmental laboratories of all types using colorimetric analysis. Continuing the high standard of reliability and low detection limits expected from SEAL– the AQ1 is a true walk-away analyzer. The AQ1 has all the advantages of discrete analysis – auto standard preparation, auto dilution, automatic method changeover, low reagent consumption – true automation. EPA approved applications include nutrients in water, waste water, soils, extracts and digests.

See the NEW AQ1 at the SEAL Analytical Booth # 2925
